

ServiceWare Resources for Android

Release notes 8.4.4

Serviceware Resources for Android 8.4.4

Introduction

This document describes the changes to the Serviceware Resources for Android app, version 8.4.4.

This version has a small fix for searching clients and locations but mostly contains changes to be compliant with the new requirements for the Google Play Store.

We hope you will enjoy using this new version of Serviceware Resources for Android and we would like to hear your feedback. You can send this by email (service@serviceware-benelux.com) or use our support phone number: 0031 (0)71-5680310.

ServiceWare Resources for Android 8.4.4

1 Fixed issues

1.1 Initial search date included times

The initial search date that was used in the client and location search was not correctly set to just the current date but also included the current time, this could cause clients and locations to not be found correctly on the last day of their validity.

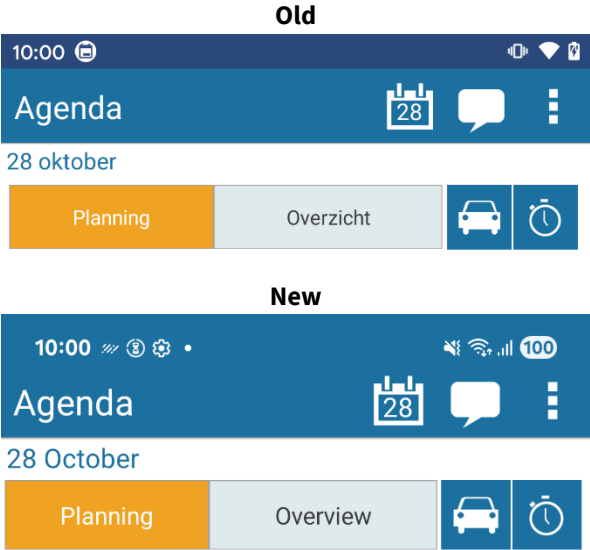

ServiceWare Resources for Android 8.4.4

2 Technical notes

To stay compliant with the Google Play Store requirements this version of the app has the following changes:

- Updated Android SDK level from Api 34 to Api 35

This has brought some changes which are mostly related to the user interface. When deployed on a device with Android 15 or higher you will no longer see the colored system bar, but Google now enforces apps to be 'edge-to-edge'.

Serviceware Resources for Android 8.4.4

3 Installation requirements

The following items are required for the installation of Serviceware Resources for Android 8.4.4:

- › Serviceware Resources for Android 8.4.4 is compatible with all Serviceware Resources (web) versions in the 7 and 8 series.
- › Windows Server 2008 SP2 or higher. In the case of the server having Windows Server 2008 installed, it needs to have at least Service Pack 2 or higher. Windows Server 2008 SP1 is not supported because of an issue with Microsoft .Net.
- › The webserver needs to have Microsoft .Net 8 installed to run the Serviceware Resources 8.5 or higher Mobile Api.
- › The Android devices require at least Android version 6.0, but we recommend a minimum of Android 11.
- › Total list of supported Android versions:
 - › Android 6 (Api 23)
 - › Android 7 (Api 24) / 7.1 (Api 25)
 - › Android 8 (Api 26) / 8.1 (Api 27)
 - › Android 9 (Api 28)
 - › Android 10 (Api 29)
 - › Android 11 (Api 30)
 - › Android 12 (Api 31) / 12.1 (Api 32)
 - › Android 13 (Api 33)
 - › Android 14 (Api 34)
 - › Android 15 (Api 35)

For a complete list of hardware and software requirements, see: “[Serviceware Resources - Hard- and Software specifications _EN_v83](#)”.
